MY MOST SUCCESSFUL FIVERR GIG.

I built some software to custom generate cookbooks in under 30 seconds. Placed a gig to make custom cookbooks based on search criteria and sold over 40 copies in 2 days. I ran a $20 WSO to kickstart sales and put me on page 1 in the popular section of my category.

Let me just start by saying thank you for purchasing this report. You should know that this is not going to make you rich. However if you want to make a few hundred extra dollars each week, this is for you.
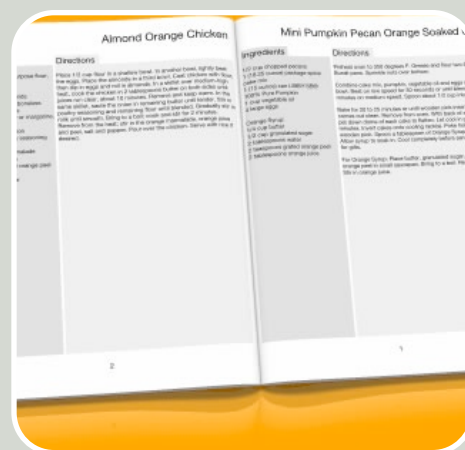

I have only known about Fiverr for just over a month. In that time it has changed my business. Now I can get just about anything done for five dollars.

There are several ways to generate revenue using this website. They take a one dollar cut from each sale leaving you with four dollars.

The first question you will need to ask yourself is "How much is my time worth?"

For me, if I can't execute and fill an order in less than five minutes, it's not worth doing. I will be outsourcing this work to someone for $20 an hour. Which means I need to be able to execute a minimum of 10 orders per hour.

The easiest way to do this effectively is by offering software services. You may already be sitting on some software that can be used to generate revenue.

Enticing graphics
I have used images of the finished product and found them to be best. Otherwise pretty girls get clicks too :)

Please Note, This report contains affiliate links. I promise to enjoy the commissions :)

8 easy ways to monetize fiverr.

Keyword Research. I have included a free copy of my keyword research software to this report. Offer to do keyword research based on a term they provide.

PDF Creation. If you have Adobe Acrobat Pro or any other PDF creation software, you could offer to convert documents into PDF files or capture websites as PDFs.

Article Submission. Using article submission software such as Automatic Article Submitter. You can submit articles to over 300 article websites.

To take this a step further, create article website of your own, and publish the articles to your own website first. Submit your article page to a few social bookmarking sites. Then about an hour later submit the article.

Google will credit your blog as the originator of the content. Put ads on your template.

Back Link Reports. Using software like SEO Spyglass, you can easily run a back link check on someone's website. Simply copy and paste the report into a spreadsheet.

Free Web Page. You could offer to host a single webpage for someone indefinitely. All you need is a domain name and a WordPress blog. Every time you get an order asked them for the text and images they want, and paste them on your blog.

You could further monetize this by putting advertising or Google ad sense in your template. Many of these people will promote the page you give

them resulting in additional revenue for you.

Article Spinning. Using the same software Automatic Article Submitter, you could easily offer an article spinning service. I am personally not a fan of article spending but people do it so why not offer it as a service?

Press Release Submission. Using one of the free press release submission websites like http://www.free-press-release.com/ you could easily offer a press release submission service.

Of course you can also create a press release website of your own, and publish the press release to your own website first. Submit your webpage to a few social bookmarking sites. Then about an hour later submit the press release using one of the free services.

Google will credit your press release blog as the originator of the content. I don't have to tell you to put ads on that website do I?

Try Selling Digital Goods. Do you have any of your own, or PLR products kicking around? One of the best-selling items right now on fiverr is an SEO video course.

I have had some success selling a database of PR contacts, stock images I shot myself, simple reports and even a meditation audio product.
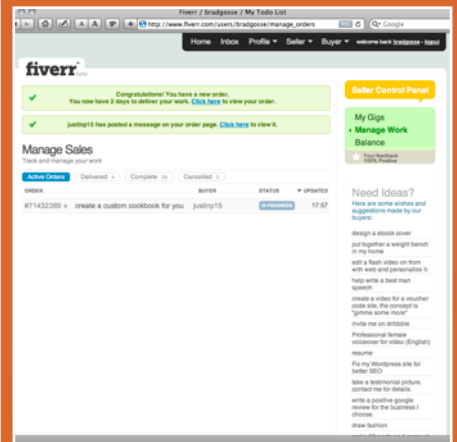

The possibilities with selling digital goods are endless. Visit websites like tradebit.com or my Internet marketing classifieds website to find plenty of PLR products to resell.

You have up to 20 offers with fiverr per account. Try to use them all and delete the ones that don't sell.

Please Note, This report contains affiliate links. I promise to enjoy the commissions :)

ADVANCED FIVERR STRATEGIES

If you know your way around database software this is for you.

Thanks for checking out my report -Brad

I'm a database junkie. Long before the Internet took off, I had a part-time business setting up and automating databases for companies.

There are plenty of databases for sale out there, some can be had for free and others, can be "scraped". Scraping websites for content is done in several ways. For me the easiest way is to put the job up on a freelance website.

In my situation I purchased database of recipes. Then using FileMaker Pro, I built a simple script to generate a PDF cookbook based on a keyword search. I.e. If you wanted a smoothie recipe cookbook, I would enter the word smoothie and click a button.

A script would run to find the appropriate recipes, randomize the order, generate a PDF title page, table of contents and recipe pages. When FileMaker Pro was done its portion of the script it would trigger an external application that I wrote using AppleScript (yeah I'm a Mac boy) that would merge the three PDF documents and compress them. All of this happens in under 30 seconds.

You can buy a database of baby names, their meanings and origins for next to nothing. Imagine how easy it would be to ask someone a couple of simple questions, enter some search terms and create a customized list of baby names.

There are no shortage of business directory databases. It would be easy to offer a business catalog based on a city or category search.

Using a movie database you could provide custom movie catalogs actor, director, writer or producer searches.

While doing this report I did a search for purchase database on Google and found no shortage of other databases like jokes, dictionary definitions, aircraft models, ISBN databases, video game cheats, Yellow Pages, web hosts, medical conditions and the list goes on.

You can see how easy it could be to create custom content using the right software and scripting combinations.

The content on this page seems a little bit over your head, feel free to get in touch with me. I can probably help you find the right resources.

Of course once you start down this path, you will come up with lots of great things to do with your content other than selling it for five dollars.

Get creative and start publishing content :-)

Thanks!

I really do value your business. My hope with this report is to deliver 100 times the value you paid. If there is anything I can do for you please feel free to contact me directly. My e-mail address is sales@yourbrainmedia.com
